

Green School Committee 2020/21

This has been an unusual year for our Green School Committee. We have not been able to meet as much as we would like but the Green Girls have still done fantastic work throughout the year. Maith sibh a chailíní! The Green Girls have been making sure that we keep up the good work maintaining our 5 flags, *litter, energy and waste, water, travel and biodiversity*.

The Green School Committee have been focusing on WOW (Walk on Wednesday) this year and we are very proud of the huge effort that all the girls have made to walk, cycle, scoot, skateboard or park and stride to school.

Next year the Green School Committee will return it's focus to working on our 6th flag, Global Citizenship, Litter and Waste.

'The overall aim of the Global Citizenship Litter & Waste theme is to create a knowledge and understanding about the link between environmental degradation and human rights. Students will learn about sustainable development and will be enabled to examine the world's interdependency and development in a critical manner in order to create real change by acting locally and effecting a more equitable, just and sustainable world for all.' - Green Schools Ireland

We are really looking forward to working on this theme and can't wait to get started after the summer!

Bíodh samhradh iontach agaibh!
